Technical Architect for the Group IT & Business Systems Team

NTI Group in Værløse is looking for an experienced Technical Architect in Business Systems to join our team for a newly established role.

We are offering an exciting opportunity, and we are looking for an experienced **Technical Architect in Business Systems** to join our team.

This is a unique opportunity for a professional with a strong background in **Salesforce architecture**, **system integration**, and **business architecture**. The ideal candidate will bring expertise in **Salesforce** and familiarity with **Microsoft Business Central**, while also playing a key role in collaborating closely with **Salesforce** and **Business Central architects** as well as **Product Owners** to ensure seamless integration and alignment across platforms.

About us

NTI Group is a successful IT company and leading full-service supplier of digital solutions for the construction, design, manufacturing and media & entertainment industries. Through software solutions, consulting services and competence development, we drive successful digital transformations, ensuring our customers maintain their leading edge in their field. Empowering innovation, process optimization, and sustainability lies at the heart of our mission.

Established in 1945, we build on many years of experience and a clear ambition to be a market leader. We hire people that are passionate, skilled, and true to themselves. Our qualified employees are our greatest strength, which is why we highly value both professional and personal qualities.

We are one of the leading Autodesk partners in the world with 900+ employees in Brazil, Denmark, Finland, France, Germany, Iceland, Italy, Norway, Spain, Sweden, The Netherlands, The Republic of Ireland and the United Kingdom. NTI Group has been backed by the Nordic private equity group Axcel since 2022.

Job description:

This is a unique opportunity for a professional with a strong background in **Salesforce architecture**, **system integration**, and **business architecture**. The ideal candidate will bring expertise in **Salesforce** and familiarity with **Microsoft Business Central**, while also playing a key role in collaborating closely with **Salesforce** and **Business Central architects** as well as **Product Owners** to ensure seamless integration and alignment across platforms.

The Role:

As the **Technical Architect in Business Systems**, you will be responsible for designing and support the implementation of integrated solutions that span multiple business systems. While you will leverage your expertise in **Salesforce**, your role will also involve coordinating with the existing **Salesforce** and **Business Central architect** to ensure seamless integration and alignment between systems. You will work closely with **Product Owners** to ensure that both business and technical requirements are met and that solutions are delivered to optimize business processes.

While **MuleSoft** experience is not required, you will be instrumental in overseeing and coordinating integrations between platforms, ensuring the solutions are scalable, secure, and aligned with the business strategy.

Key Responsibilities:

- Design and support implementation of integrated **Salesforce** solutions, ensuring seamless integration with other enterprise systems, particularly **Microsoft Business Central**.

- Coordinate the integration strategy between **Salesforce** and other business systems, ensuring the architecture supports long-term scalability, performance, and security.

- Develop and maintain architectural roadmaps that guide integration and ensure business processes are optimized.

- Work with cross-functional teams to ensure that solutions meet business goals and are delivered on time, on budget, and with the required technical capabilities.

- Act as a key liaison between business stakeholders, product teams, and technical architects, ensuring alignment between business objectives and technical design.

- Provide leadership and support to technical teams, ensuring best practices in **Salesforce** integration and system architecture.

- Ensure that all systems work cohesively and support seamless business operations, providing technical guidance as needed throughout the project lifecycle.

What You will Bring:

- Proven experience as a **Salesforce Architect**, with strong expertise in **Salesforce architecture**,

integration, and customization.

- Solid experience in **system integration** with cloud platforms and ERP systems (preferably **Microsoft Business Central** or similar).
- Strong knowledge of **business architecture** and experience aligning technology with business goals and processes.
- A strategic approach to integrating systems, ensuring that solutions are scalable, secure, and efficient.
- Strong leadership skills and the ability to guide teams through technical challenges while fostering collaboration across teams.
- Problem-solving and critical thinking skills, with the ability to design solutions that meet both business and technical needs.

Why Join Us?

- Be part of an innovative team that values collaboration, growth, and continuous learning.
- Opportunity to shape the architecture and integration of key business systems in a dynamic environment.
- Flexible working arrangements and career development opportunities in a supportive culture.
- Competitive salary and comprehensive benefits package.

If you are a **Technical Architect** with experience in **Salesforce**, a passion for system integration, and the ability to collaborate closely with business and technical teams, we'd love to hear from you.

What we offer

- A newly established position in a growing global organization where you can have significant impact.
- A strong focus on developing your professional and personal skills.
- An open and informal work environment, where you collaborate closely with skilled and dedicated colleagues.
- Varied and challenging tasks, driven by our rapid growth and acquisition strategy.
- A competitive salary package that evolves with your qualifications.
- Newly renovated premises with free parking and the possibility of electric charging.
- In our opinion, Denmark's best lunch program with our own chefs.
